

Grades 6-8

Holyoke Alternative Program

Holyoke Public Schools

Vision

The vision of the Holyoke Alternative Program is to have our students meet academic and social standards to successfully continue their education in their home schools, by providing short-term intervention programs that offer a highly structured learning environment designed to address the academic and behavior needs of at risk students. The mission is that every student, regardless of behavioral issues deserves a chance to succeed. Our goal is to increase academic achievements in all subject areas with special focus on Mathematics, Reading, and Language Arts through developmentally appropriate instruction. It is the joint responsibility of the parents and educators to see that children develop academic skills and demonstrate behavior conducive to learning.
