

HOLYOKE PUBLIC SCHOOLS

SCHOOL LIBRARIES

Mission

The mission of the Holyoke Public Schools Library Media Program is to provide print and non-print resources that support the curriculum, to teach information literacy skills and to support a diverse community of readers by providing informative and appealing materials for our students, staff and families.

Vision

The vision of the Holyoke Public Schools Library Media Program is that all students acquire a lifelong love of reading for both pleasure and inquiry and demonstrate grade level reading proficiency by the time they graduate from high school. All students will also be effective users and producers of information in order to become successful citizens in a global society.

Philosophy

The philosophy of the Holyoke Public Schools Library Media Program is to offer the best possible resources for all patrons in a welcoming and safe environment. As the core of teaching and learning activity in each school, the library media center is readily accessible and provides materials that are relevant, current and engaging.
